# //// CORE ADVANTAGES ///

Inrico has its own RND team for PoC platform to ensure flexile customization for partners, reducing time and energy for cross-supplier compatibility concerns.

**100% Self Owned  
PoC Platform**

**AES 256  
Encrypted**

**Open & Sharing  
Mindset**

Inrico's Push-to-Talk Over Cellular platform offers a very secured data protection method, its AES 256-bit encryption ensures communication security .

Inrico is open to its partners/clients for standard software and customized software service, the professional RND team is ready to support the requirement anytime.

# INRICO PARTNERS

*INRICO works with its partners in various ways to build a global ecosystem, together to make the communication easier and better.*

**GROW WITH INRICO, WIN TOGETHER.**

# INRICO **S**ERVICE

# **G**LOBAL REFERENCES

# PUBLIC SAFETY

## X Prison

**Background:** A DMR/PDT communication system (Tier II) was built and has kept running for the past 5 years. Due to lack of timely data push to safeguard the prison, end user has selected Inrico PoC solution as their main operation system to further enhance the safety & security of the prison.

**System Includes:**

- 800 Accounts
- Inrico Dispatcher

## Myanmar Police

**Background:** Myanmar Police and relevant Gov. dept. had an existing communication system for long. With higher data requirement as the priority for their daily communication and operation, the customer selected Inrico for its high quality of voice call and secured data service to serve all the dept. and keep up with work efficiency.

**System Includes:**

- 5,000 PCS T320
- Inrico Dispatcher

# MOBILE OPERATOR

**Background:** With the rapid development of public network technology and infrastructure, communication is getting easier in most of the countries. A big number of operators used to run both public network & private network (namely iDen/Analog), are now looking for an alternative solution to upgrade the network to a modern platform to reduce their operation costs such as frequencies and maintenance cost. The new PoC technology is more than ever required by those who are trying to break the ice.

# TRANSPORTATION

**Background:** Narrow band communication is good enough for daily operations for transportation users when it's within the signal coverage with minimum data requirement. When it comes to Video streaming/Photo push/Location service, etc. for cross team communications, a Push-to-talk Over Cellular system is more than ever preferred. Inrico's PoC system has been adopted and serving lots of clients and helped them to improve operations in various scenarios.

**Changi Airport  
System Includes:**

- 250PCS T199

**UTS, USA  
System Includes:**

- 300PCS TM7 Plus

**PROEXCOM  
TELECOMUNICACIONES  
System Includes:**

- 420PCS TM7

**PMI, Indonesia  
System Includes:**

- TM7
- T199

# HEALTHCARE

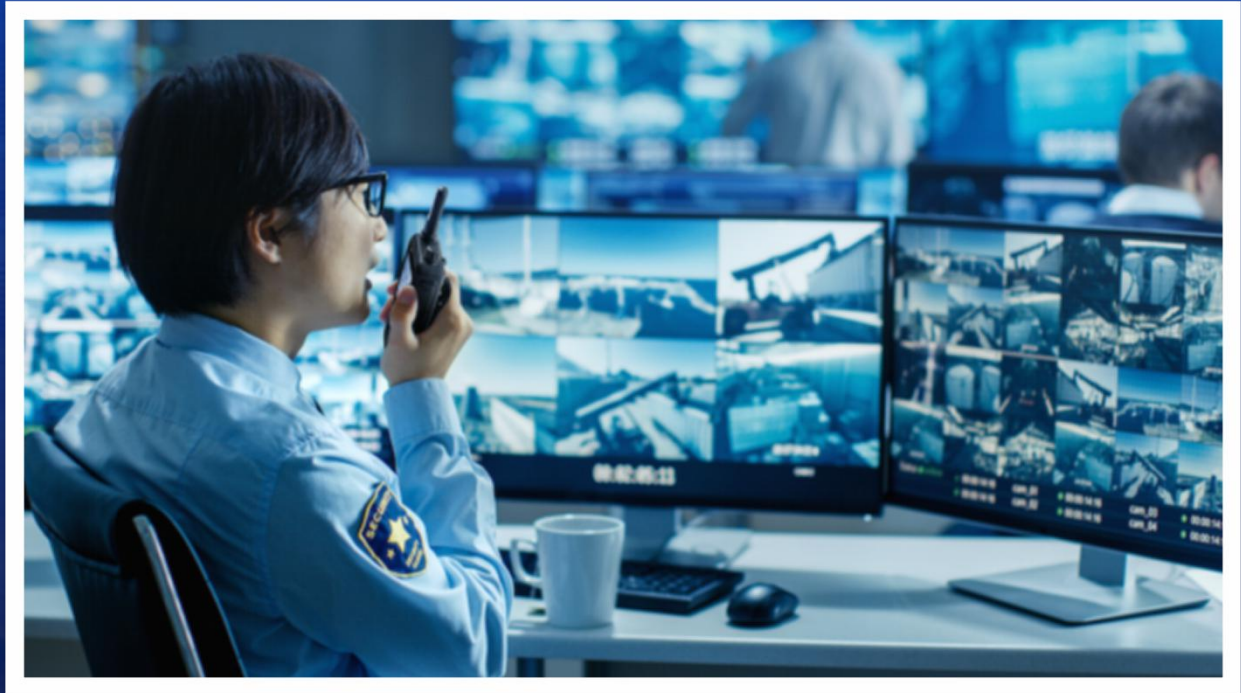

**Background:** Cross-team communication gap between different frequency has always been the challenge for healthcare workers. Delayed communication may cause big problem. Inrico LTE-LMR converged PoC solution offers healthcare professionals with abundant features, such as voice call, real time positioning, SOS, multimedia message, video call, etc., which empowers user to have visualized management of treatment follow-up, mobile monitoring, telemedicine, patient data management, drug tracking, medical waste tracking, etc.

# PROPERTY MANAGEMENT

**Background:** Reliable daily communication is highly required by security guards 24/7. One missing call or a failure of location sharing could lead to a big accident no matter it's a hotel or office tower. To keep up the high-quality communication, Inrico offers a comprehensive solution for property management companies worldwide. Timely sharing location of each guards and push the patrol data to the control center accurately is required by customers from different country & regions. Seamless communication for cross teamwork is well fulfilled by this system.

**Greenland Property  
System Includes:**  
2350PCS MT330;T320

# CONSTRUCTION

**Background:** Calling with VHF narrow-band communication equipment is good enough for construction teams and warehouse staff, but it will be getting much delayed when staff are out of VHF coverage or handling an emergency case especially when the management wants to know exactly the frontline activities. Inrico PoC solution offers customers with feature rich communication, realizing intelligent management of the vehicle, provide voice communication, GPS positioning, track playback, geo-fencing and other functions to make the staff work easier.
